**In “Urban and Suburban ...” lovely photography of the beauty and biodiversity of the meadow is skillfully shown. Warm up watching a FREE movie with inspiring photography of flowering meadow landscapes.**

**The video addresses the problems caused by the extensive planting of pesticide-ridden, non-native grass lawns across America. While it is impractical to eliminate lawn, we cannot ignore the environmental consequences of such landscape planning as ecosystems are being destroyed and replaced with chemically maintained monocultures.**

**Donations are appreciated, to plant the seed before they come.**
