

# Saving Birds with Native Landscapes

Presented by Rachelle Roake

## Date

Sept 7, 2016 (Wed)

## Time

7:30-9 (doors open at 7)

## Location

St Daniel's Church  
(7010 Valley Park Dr,  
Clarkston)

## Cost

**FREE** to the public!

*Donations are always  
welcome to help bring future  
educational opportunities!*

Habitat loss is the leading cause of bird population declines, but through cultivating native landscapes, no matter the size, we can make a difference. Your backyard, office, or school can make a significant impact for birds by incorporating native plants.

This presentation will discuss the vital connections between birds and native plants and provide an introduction to actions Michigan Audubon and other Audubon groups nation-wide are taking to promote native landscapes for birds.

## About the Presenter

*Rachelle Roake is the Conservation Science Coordinator for Michigan Audubon. She manages Michigan Audubon's network of sanctuaries, works with fantastic volunteers, and handles local and state-wide bird conservation issues. Rachelle received a B.S. in Ecology from the University of Michigan in 2009 and a M.S. in Wildlife Sciences from Auburn University in 2013. Through her work with Michigan Audubon, she hopes to inspire birders to take action to conserve the birds that never cease to inspire us all.*
